Joint Marketing Agreement

EPM Services de México and Supertech Project Management Inc. announce the signing of reciprocal marketing agreements for their PAT (Portfolio Analyzer Toolkit) and EVEngine™ - Project Control software

Date Released: 04/12/2010

PAT (Portfolio Analyzer Toolkit) is a Microsoft® Office Excel Add-in productivity tool that enables organizations to perform leading edge project portfolio analysis. PAT offers organizations regardless of size a pragmatic, comprehensive approach to support their project / portfolio investment decisions. Specifically: • Portfolios of up to 200 hundred projects, • Up to 25 user-defined numeric and non-numeric Project Level attributes, • Up to ten user-defined Business Priorities (strategic objectives) per analysis. • Project Strategic Fit calculation and relative ranking. • Multi-Criteria prioritization using up to four numeric attributes. • Portfolio optimization is based on a user controlled combination of cost and resource constraints, as well as "Must-Do" scenarios, and • The resulting worksheet can be rendered on any Windows SharePoint site, using MOSS with Excel Services. PAT includes embedded project portfolio analysis best practices that are normally only found in tools costing thousands of dollars more. EVEngine is a Microsoft® Office Excel Add-in productivity tool that provides Earned Value Performance Management (EVPM) to internationally accepted standards and guidelines. Specifically: • Project Management Institutes PMBOK® Guide - Fourth Edition, together with the PMI's Practice Standard for Earned Value Management, and • ANSI/EIA 748-B - Earned Value Management Systems guidelines. EVENGINE utilizes cost, work and quantity / material data imported from Microsoft® Office Project 2003 or 2007, Primavera®: Versions 5 & 6, or from any scheduling software via an XLS drop file to create a Microsoft Office Excel Workbook or data can be entered directly via a spreadsheet wizard. EVENGINE extends conventional EVPM reporting to include profit and loss analysis, financial modeling, and performance measurement. According to James Bulmer, CEO of Supertech Project Management Inc. "As an organization that based our world class EVPM software on Microsoft's Excel platform, we are very excited to have the opportunity to market PAT which utilizes the same core software. PAT offers organizations a very powerful tool to perform highly sophisticated project portfolio analysis; and the results can easily be displayed graphically. These include Cumulative Investment Vs. Value, Project Positioning, Relative Investment and Resource Assignment Vs. Business Priorities." The Supertech Project Management Group specializes in the implementation of project management planning and control software systems, consulting, training and mentoring services. Since the company's establishment in Melbourne, Australia in 1986, it has participated as project planners and cost controllers for companies and corporations engaged in the execution of small, medium to large projects in a wide range of industries, in Australia, Asia Pacific, South Africa, Europe, UK, Canada and the USA. Oscar Estrada, Socio Director of EPM Services de México, said "The ability to market EVENGINE to our clients is a key piece in our strategy of joining with highly successful project focused organizations that have products that are complementary to PAT. Having worked with James Bulmer and the Supertech team for a number of years, we are confident that they will work closely with us to provide professional advice, support and training to organizations which want to implement earned value management to world-class standards." EPM Services de México is an association of consultants that specialize in accelerating the adoption of process and portfolio management tools and projects based on technologies from Microsoft Corporation.Their consultants have over 40 successful implementations in various industries including Oil and Gas, Healthcare, Insurance and Banking, Government, Retail, and Consumer Goods. In a number of countries such as the USA, UK, Mexico, and Latin America.
